2/10/72

Dear Jim,

Because it might interest Larry, I went over the two Trapnell files I was glad to get. There is a third. You can get it from the Archives faster and at no greater cost than my machine entails, and have a clearer copy. It is CD394:1-6.

There is strange stuff here, much for which I will not have time that is just like it, and the most remarkable kinds of coincidences. At the risk of flying into the face of all that science, I'd say that there is nothing in these reports aside from the medical opinions to give any indication of any paranoia. Other illness, yes. Liar, etc, sure. But no reflection of paranoia. The behavior, rather, is exactly the opposite, except in one sense: I understand paranoids go around trying to make enemies, and perhaps he was trying to get the FBI after him.

Now at exactly the time he says there was a plot vs RFK being talked about in Miami (where all the addresses are close to real ones), there was a similar one talked about in NYC of, by all things, another and certified nut named something like Gongora. A dubious character Stanley Ross fed this to the FBI and wrote of it in the paper he then had and got a lot of attention in 1966 on it. You will find it in CE1444.

The name LLanusa suggests one I can't remember used by Bringuier as a Miami contact. The organization referred to by Trapnell is suggested as a Student Union. Bringuier and his cat were Student Directorate.

Could these nuts (that is, in this case real nuts not officially so certified) have had plans to Bobby's home. Up, from one of my (former CIA)sources, who says the plans for the book The Bay of Pigs and the deal was made there. Haynes Johnson should know. The index to his book, by the way, includes LLanso, and a Sosa (not Sousa).

There are strong parallels to other such nut reports we have.

How many similar ones can there be without them coming from some kind of source.

I am quite willing to believe there is nothing to this, as the FBI did, but there are so many strange things. Like Seymour looking like Oswald and involved in such activity, reports, also false, of an Oswald phoning in on a radip prorgam in those years. And on and on and on.

Doing this in haste to get in a.m. mail in case any of you has an interest. I have a call in to Larry to see if he has any further interest.

Best,
